Blue&Gold Transit Collective

Project Sponsor: Erik Nielsen

Faculty Mentor: Smirthya Iyer

Team Members: Brenden Matteson, Maddux Houseman, Adolfo Lopez Villanueva

Introduction

The purpose of this document is to explain the roles of each member of our team and the expectations we will have for each member. The following pages will highlight the responsibilities that each member has, the format and expectations of our team meetings, and some of the tools we will be using to effectively work together and reach our goals.

Team Members and Roles

Team Leader: Brenden Matteson

Customer Communicator: Adolfo Lopez Villanueva

Recorder: Maddux Houseman

- Note: We may switch between meetings, but Maddux will be our primary recorder.

Architect: Brenden Matteson

Release Manager: Maddux Houseman

Coder:

- Front-end: Adolfo Lopez Villanueva
- Back-end + Node.js: Brenden Matteson
- Back-end: Maddux Houseman
- Note: We expect to collaborate on both the front-end and back-end aspects of the project.

Editor: Adolfo Lopez Villanueva

- Note: All members are required to review documentation before submission.

Team Meeting Expectations

Weekly Meeting Times: 11:30-12:30 a.m. on Friday, our back-up meeting is online on Mondays from 9:30-10:30 a.m..

Agenda Structure: Go over what each person has done for the project at the beginning of each meeting as well as what they have left to do, if anything.

Minutes: Meeting minutes are all stored in a shared Google Drive folder, which all members have access to.

Decision-Making Process: We will be using a 2/3 majority vote when there is a conflict in decision making. A compromise may be in order if all three members disagree.

Attendance: Max 3 missed meetings; notify by Wednesday before Friday meeting, excluding emergencies.

Team Standards
September 15, 2026

Late Policy: try to be on time as much as possible, however buses are inconsistent so being a little late is acceptable. Never be late for client meetings.

Conduct:

- Interaction Expectations:
 - Be Respectful
 - Have an Open Mindset
 - Project Focused Conversation
 - Be Dependable
 - Positive Mindset
- Handling Conflict:
 - Begin with a polite heads-up, followed by a formal discussion in a meeting, followed by discussion with team mentor, and ending in a team discussion with the CS Capstone Organizer.
 - We will write an incident report for each incident, including what happened, the date, proposed resolution, outcome, and at least two signatures of proof from other team members.

Tools and Document Standards

Version Control: GitHub – We have a dev branch where we will push any changes. Then, the team will review these commits before pushing it into the main branch. Any commits should be completed and ready to be tested. Release Manager will decide if new branches need to be made.

Issue Tracking: Using task tracker and GitHub issues.

Word Processing and Presentation: Microsoft Word is used for any documentation needed for deliveries/tasks for the team. Microsoft PowerPoint is used to create presentations for the team. Any new tools that need to be used, the member using them should communicate that to the team.

Composition and Review: All drafts should be of high-quality maintaining a professional tone for consistency and ease of editing. Drafts must be completed maintain at least 24 hours before the due date to allow the editor enough time to read over and edit the draft to satisfactory standards.

Team Self Review

We want to discuss team evaluation at least once a month, if not twice a month, where we have an individual assessment of our own work, what we have done well, what we feel we could improve on, and how we can implement this improvement. At this time, we would also like to open a group discussion about what we are doing well as a team, and what things we feel we could improve. This would also include peer evaluations of each other, Ex. “X, I feel like you did this well... I feel like you could have done this better.”
